

# DAILY SWING TRADING GUIDE

OCTOBER 26, 2016

Ryan Belknap

Good afternoon. Ryan and I enjoyed this afternoon's session very much and we hope the feeling is mutual! Once again, the broad markets were a snooze but unlike yesterday, we do have some new orders heading into tomorrow. Both new trades come from the energy sector and we actually saw quite a bit of industry group rotation confirmation for those as well. Those trades are detailed below. We also have one trade coming to a close tomorrow morning and that is detailed below and in the recording as well. Have a wonderful rest of your evening and we will see you Friday.

## Today's Picks

Symbol	Strategy	Trade	Confirmation
<b>APC</b>	<b>T3-S1</b>	<b>Long</b>	<b>Higher Low Pivot</b>
APC has been in a great uptrend and is now presenting us with a new higher low. It is oversold as well, making it a prime swing candidate. It will be bought MOO.			
<b>DVN</b>	<b>T3-S1</b>	<b>Long</b>	<b>Higher Low Pivot</b>
DVN has almost the exact same setup as APC. A great higher low on a strong uptrend and volume is on the rise. It will be bought MOO tomorrow.			

## Open Positions
